LYON WOOD CABINETS

Lyon Wood Cabinets have smooth outside surfaces and are trim in design and construction. Top, bottom and frame of the cabinet are made of hardwood. Back and sides are pressed wood panels. Doors are made of two pressed wood panels mounted over a hardwood frame and attached with three tight-pin hinges. Adjustable shelves are made of softwood with bearer arms at each end.

Left hand door latches at top and bottom with latches controlled by projection tips at the center. Right hand door has streamlined metal handle with thumb controlled latch and built-in flat key lock with two keys.

All surfaces finished in green enamel. Assembled with bolts, wood screws and moisture resistant glue. Shipped set up only.

Add 6 inches to above heights for sanitary legs.

Lockers have hardwood top, bottom, and frame. Backs and doors are pressed wood. Doors are two pressed wood panels mounted over a hardwood frame. Finished in green enamel. Shipped knocked down in continuous sections 2 or 4 lockers wide only.

DOUBLE TIER

Double tier lockers have a lower cost per opening and require less floor space. Where lockers have short period occupancy and where long outer coats are not worn, double tier lockers have wide usage. Both upper and lower lockers are easy to reach. Double tier lockers do not have shelf but are equipped with three single prong coat hooks.

SHOPROBES

(Patent No. 2202427)

Lyon Shoprobes are portable and require minimum floor space—only 13-3/5 square feet for a 20 person unit. Especially suited to industries where personnel fluctuates and low storage cost is a prime requirement.

Each person has a private compartment at convenient height and full length storage facilities for coats. There is complete circulation of air around the outer garments and perforations in doors and backs circulate air through compartments. Pressed wood doors are fitted with self closing spring hinges and padlock attachment. (Padlocks not furnished).

Garment cord of pliable plasitc tubing with wire inlay may be attached to hangers. Cord is run through sleeve of coat and end is padlocked to compartment door.

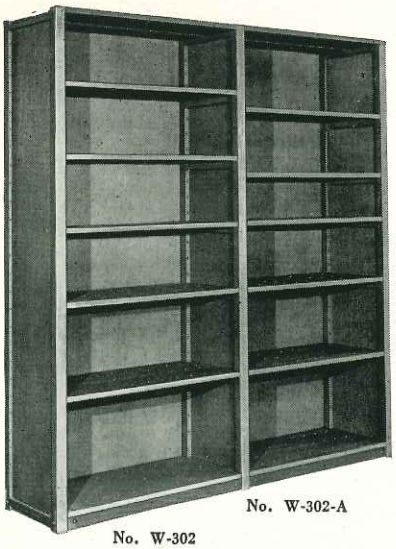
LYON WOOD SHELVING

(Patent Applied For)



No. W-302-A

No. W-302

Lyon Wood Shelving is made in open and closed types. Sections are 36″ wide and 84″ and 96″ high and may be had in 12″, 18″, or 24″ depths.

Two piece top, base rails, shelves, lateral braces, bearer arms and uprights are made of solid hardwood. Panels in closed uprights, lip on open uprights, back panels and crosswise dividers are ¼″ plywood. Wood sanded smooth and finished with preservative coating to reduce moisture absorption. Finisher contains enough color to give rack a dull, greenish tint.

Racks are quickly set up with inexperienced help. Uprights are held in position while base rails are bolted in place. Bottom shelf is dropped into place and two piece top is dovetailed into upright members. Bearer arms are slipped into place on metal clips, and shelves are dropped into position.

Shipped knocked down with necessary metal fittings and erection instructions.

Additional sections same as first section less one upright.
